Screen Reader : Supported
Enhanced typesetting : Enabled
Print length : 114 pages

The exam is divided into three sections:

1. **Algebraic operations and properties**
2. **Functions**
3. **Graphs**

Each section is worth about one-third of the total score.

Tips for Success

Here are some tips for success on the DSST Fundamentals of College Algebra exam:

- **Review the material thoroughly.** The best way to prepare for the exam is to review the material thoroughly. This means going over your notes, textbooks, and practice problems.
- **Take practice tests.** Taking practice tests is a great way to get a feel for the exam and to identify areas where you need more practice.
- **Get a good night's sleep before the exam.** You will need to be well-rested on the day of the exam in order to perform your best.

li>**Arrive at the exam on time.** You will want to give yourself plenty of time to get settled in and to relax before the exam begins.

- **Read the instructions carefully.** Make sure you understand the instructions for each section of the exam.
- **Answer the questions to the best of your ability.** Don't be afraid to guess if you don't know the answer to a question.
- **Go back and check your work.** Once you have finished the exam, go back and check your work for any errors.

Strategies

Here are some strategies for answering questions on the DSST Fundamentals of College Algebra exam:

- **Use the process of elimination.** If you don't know the answer to a question, try eliminating the answers that you know are incorrect. This will increase your chances of guessing the correct answer.

- **Look for patterns.** Many of the questions on the exam are based on patterns. If you can identify the pattern, you can often solve the question quickly and easily.
- **Use your calculator wisely.** A calculator is allowed on the exam, so use it to your advantage. However, don't rely too heavily on your calculator. You should still be able to solve problems without using a calculator.

Practice Problems

Here are some practice problems to help you prepare for the DSST Fundamentals of College Algebra exam:

1. Simplify the following expression:

$$(2x + 3)(x - 5)$$

2. Solve the following equation:

$$x^2 - 5x + 6 = 0$$

3. Graph the following function:

$$f(x) = 2x^2 - 3x + 1$$

For more practice problems, visit the DSST website.

The DSST Fundamentals of College Algebra exam is a challenging exam, but it is one that you can pass with the right preparation. By following the tips and strategies outlined in this guide, you can increase your chances of success.
